

Pre Interview Typescript Project

Required - make sure to have it installed before setting up Unit Test

1. Node.js - [Node.js — Download Node.js®](#)
2. Git - [Git - Downloads](#)

Unit Test setup

We are using 'ts-jest' framework for Unit Testing.

1. Create new Project Folder. This folder will contain all the necessary files.
2. Navigate to that folder through a Terminal or Command-line interface.
Run : `cd [path-to-that-folder]`
3. Clone Github repository.
Run : `git clone https://github.com/SadSic/pre-interview-ts-project.git`
4. Open Project Folder you just cloned in a Visual Studio Code or any Code editor of your choice.
5. Open new terminal.
Run these code :
`npm install --save-dev typescript`
`npm install --save-dev jest`
`npm install --save-dev ts-jest @types/jest`
6. You can now use Unit Test.
Run : `npm test`
